Non-residential buildings had the highest number of constructions

In the month of January 2024, the Province of Oriental Mindoro recorded a total of 82 constructions based on the approved building permits.

By type of construction, non-residential buildings reported the highest number of constructions at 46, accounting for 56.1 percent of the total number of constructions during the month. Majority of the non-residential constructions were commercial buildings.

Meanwhile, residential building type constructions followed in terms of number of constructions at 32, constituting 39.0 percent of the total number of constructions during the month. Most of the residential constructions were single-type houses with 24 (75.0%).

Addition, and alteration and repair of existing structures had a total of 4 constructions, which contributed 4.9 percent to the total number of constructions in the province during the reference month.

Technical Notes

The Philippine Statistics Authority (PSA) stands as the primary statistical authority tasked with the collection, compilation, analysis, and dissemination of statistical information. Construction statistics play a pivotal role in understanding the pulse of economic development and urban growth within the Province of Oriental Mindoro. As a vital component of economic indicators, these statistics offer valuable insights into the trajectory of the construction sector, which serves as a cornerstone of infrastructure development and societal progress.

Construction statistics from approved building permits aim to provide monthly administrative-based data on building constructions at the municipality level nationwide. Statistics generated are the following:

1. number of units/buildings
2. floor area of the buildings
3. types of construction
4. value of construction

The statistics cover various aspects of construction, including new constructions, renovations, alterations, demolitions, and additions to existing structures.

DEFINITION OF TERMS

The definition of terms is adopted from the Revised and Updated IRR of the National Building Code.

Building permit is a written authorization granted by the LBO to an applicant allowing him to proceed with the construction of a specific project after plans, specifications, and other pertinent documents have been found to be in conformity with the National Building Code (PD 1096).

Building refers to any independent, free-standing structure comprised of one or more rooms or other spaces, covered by a roof and enclosed with external walls or dividing walls, which extend from the foundation to the roof.

Construction refers to all on-site work done from site preparation, excavation, foundation, assembly of all the components and installation of utilities, machineries, and equipment of buildings/structures.

Residential building is a building for which its major parts or more than half of its gross floor area is built for dwelling purposes. This type of building can be of the single type, duplex, apartment and/or accessoria, and residential condominium.

Single house is a complete structure intended for a single family or household, i.e., bungalow, 2-storey house, nipa hut, etc.

Duplex house is a structure intended for two households, with complete living facilities for each; it is a single structure divided into two dwelling units by a wall extending from the floor to the ceiling.

Apartment is a structure, usually of two storeys, made up of independent living quarters, with independent entrances from internal walls and courts.

Accesoria is a one or two-floor structure divided into several dwelling units, each dwelling unit having its own separate entrance from the outside.

Residential condominium is a structure, usually of several storeys, consisting of multiple dwelling units.

Other residential construction consists of school or company staff houses, living quarters for drivers and maids, and guardhouses.

Non-residential buildings include commercial, industrial, agricultural, and institutional buildings.

Commercial buildings refer to office buildings and all buildings which are intended for use primarily in wholesale, retail, and service trades; i.e., stores, hotels, restaurants, banks, disco houses, etc.

Industrial buildings are buildings used to house the production, assembly, and warehousing activities of industrial establishments; i.e., factories, plants, mills, repair shops, machine shops, printing press, storage plants, electric generating plants.

Institutional buildings are buildings which primarily engaged in providing educational instructions and hospital/health care; ports, airports and other government buildings; i.e., schools, museums, libraries, sanitarium, churches, hospitals.

Agricultural buildings are buildings used to house livestock, plants, and agricultural products such as barns, poultry houses, piggeries, stables, greenhouses, and grain mills.

Other non-building constructions include cemetery structures, street furniture, waiting sheds, communication towers, etc.

Addition refers to any new construction which increases the height or area of an existing building/structure.

Repair is a remedial work done on any damaged or deteriorated portion/s of a building/structure to restore its original condition.

Renovation is any physical change made on structures to increase their value and quality.

Alteration is a construction in a building/structure involving changes in the materials used, partitioning and location/size of openings, structural parts, existing utilities, and equipment but does not increase the overall area thereof.

Conversion is a change in the use or occupancy of structure or any portion thereof, which has different requirements.

Demolitions refer to the systematic dismantling or destruction of a building/structure, in whole or in part.

Street furniture are street structures consisting of monuments, waiting sheds, benches, plant boxes, lampposts, electric poles, and telephone poles.

Floor area of building refers to the sum of the area of each floor of the building measured to the outer surface of the outer walls including the area of lobbies, cellars, elevator shafts, and all communal spaces in multi-dwellings. Areas of balconies are excluded.

Total value of construction refers to the sum of the cost of building, electrical, mechanical, plumbing, and others. The value is derived from the approved building permit and represents the estimated value of the building or structure when completed.
