* Year-on-year change of average CPI for June 2025 vs 2024

The headline inflation in the City of Puerto Princesa decelerated to 3.9 percent in June 2025, from 4.2 percent in the previous month. In June 2024, the inflation rate is higher at 4.1 percent. (Table A and Figure 1)

The downtrend in the overall inflation rate in Puerto Princesa City in June 2025 was primarily brought by the lower index in Housing, water, electricity, gas and other fuels, posted at 1.3 percent and 3.2 percent in May 2025. This was followed by an 8.0 percent decrease in Restaurants and Accommodation Services in the current month, compared to 12.0 percent in the previous month. Also contributing to the deceleration were Personal

Care and Miscellaneous Goods and Services, registered at 3.4 percent in June 2025 and 3.6 percent in the past month.

Technical Notes

Consumer Price Index is an indicator of the change in the average prices of a fixed basket of goods and services commonly purchased by households relative to a base year.

- **Market Basket** is a sample of goods and services, which is meant to represent the totality of all the goods and services purchased by households relative to a base year.
 - To determine the commodities that will form the market basket for the 2018-based CPI, the Survey of Key Informants (SKI) was conducted in March 2021. The survey, which was conducted nationwide to store managers, sellers or proprietors, obtained information on the most commonly purchased of goods and availed of services by the households.
 - The commodities in the 2018-based CPI market basket are grouped/classified according to the 2020 Philippine Classification of Individual Consumption According to Purpose (PCOICOP) which is based on the United Nations COICOP. Meanwhile, the commodities in the 2012-based CPI market basket used the 2009 PCOICOP version of classification of commodities.
- **Base year** is a reference period, usually a year, at which the index number is set to 100. It is the reference point of the index number series. The CPI is rebased from base year 2012 to base year 2018.
- **Inflation Rate** is the annual rate of change or the year-on-year change in the Consumer Price Index (CPI).
