

SPECIAL RELEASE

Oriental Mindoro Volume of Production of the top 10 other Crops in 2023

Date of Release: 31 March 2025

Reference No. 2025-SR-71

Production Volume of the Top 10 Other Crops

The total production of the top 10 other crops declined during 2023 to an estimated 57,548.86 metric tons, a decline of 2.04 percent or 1,197.59 tons compared to the 58,746.45 metric tons produced in 2022.

Volume of Production by Crop

Coconut matured production in 2023 declined by 1.77 percent, resulting in 56,932.06 metric tons. A decrease of 1,023.41 metric tons compared to the 2022 production of 57,955.47 metric tons. Typhoons damaged coconut trees leading to smaller and fewer nuts, contributing to lower production (Figure 2).

Abaca production decreased by 11.85 percent in 2023, with an estimated 67.22 metric tons. This represents a decrease of 9.04 metric tons compared to the 2022 production of 76.26 metric tons. The low buying prices discourage the farmer from stripping the abaca resulting in lower production for 2023.

The estimated total production of kaong in Oriental Mindoro reached 35.42 metric tons. This represents a significant increase of 18.54 percent or 5,54 metric tons compared to the 29.88 metric tons produced during 2022. The local producer's good management (clearing of underbrush, thinning, and pruning leaves) contributed to this growth of production (Figure 5).

The production of coffee in Oriental Mindoro increases due to the higher demand for coffee products in restaurants, hotels, motels, pasalubong centers, and other establishments in the province as promoted by the local tourism office. The coffee Robusta increased by 72.81 percent or about 4.23 tons, coffee liberica increased by 104.24 percent or about 2.95 tons and the coffee excelsa has an increase of about 66.77 percent or about 2.95 metric tons. As shown in figure 6.

Technical Notes

The Crops Production Survey (CrPS) is one of the major agricultural surveys conducted by the Philippine Statistics Authority (PSA). This survey aims to generate estimates on the volume of production, area planted/harvested, a number of bearing trees/hills/vines, and farmgate prices for crops other than palay and corn at the national and sub-national levels.

DEFINITION OF TERMS

Crop Production - This refers to the quantity produced and harvested for a particular crop during the reference period. It includes those measured but damaged, stolen, given away, consumed, given as harvesters' share, and reserved. Also included are those productions from "pakyaw" and "contract growers". On the other hand, excluded are those produced but not harvested for whatever reason/s.
