The Philippine Statistics Authority (PSA) Marinduque Provincial Statistical Office (PSO) successfully conducted the **May 2024 Re-designed Rice and Corn Stocks Survey: Commercial (RCSS: C)**, from 01 to 04 May 2024. The PSA's authority and mandate to conduct this survey emanates from Republic Act (RA) 10625, or the Philippine Statistical Act of 2013, which authorizes the PSA to prepare and conduct surveys and periodic censuses on various sectors of the economy.

The **Re-designed RCSS: C** is a monthly survey which gathers information on rice, corn grain, and corn grits stocks stored in the commercial establishments as of 6:00 AM of the first day of the reference month. The data that will be collected in this survey, together with the stocks in household and government sectors, will be used to monitor stocks situation of the food staples to ensure supply and demand equilibrium, access, and price stability. It also serves as inputs to the estimation and compilation of national accounts. Moreover, the survey supports the data needs of government planners, policy and decision makers, and other stakeholders in the agriculture sector particularly the National Economic and Development Authority (NEDA), National Food Authority (NFA) and Department of Agriculture (DA) and the general public.

Primarily, this re-designed **RCSS:C** aims to generate rice and corn stocks inventories held by the commercial sector at the national and regional levels and assess the stock levels compared with the same period in the previous year, and the previous month.
